The New Zealand Approximation Theory Group presents

Approximation and Harmonic Analysis
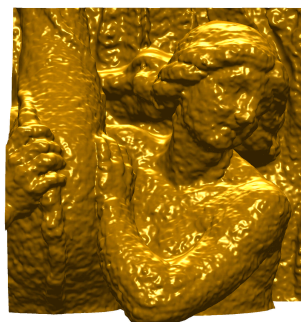

Auckland, New Zealand
8-11 February, 2005

Invited speakers:

J. Benedetto (Maryland), **C. de Boor** (Wisconsin), **L. Bos** (Calgary),
P. Casazza (Missouri), **X. Duong** (Sydney), **S.L. Lee** (Singapore),
D. Levin (Tel Aviv), **D. Mache** (Bochum), and
V. Totik (South Florida and Szeged)

The conference theme, Approximation and Harmonic Analysis,
will be interpreted broadly. We expect participants with interests
in function spaces, wavelets, frames, splines, CAGD and radial basis
functions, and other participants whose main interest is in applications.
