

## List of Publications of Eduard S. Belinsky

- [1] Belinskii, E. S., Belyi, V. I., Integral representations with associated kernels, and generalized integro-differential operators. (Russian) Metric questions of the theory of functions and mappings, No. 2, pp. 21–36. Izdat. “Naukova Dumka”, Kiev, (1971).
- [2] Belinskii, E. S., Trigub, R. M., On a relation in the theory of Fourier series. (Russian) *Mat. Zametki* **15** (1974), 679–682.
- [3] Belinskii, E. S., Approximation by Bochner-Riesz means, and the spherical modulus of continuity. (Ukrainian) *Dopovidi Akad. Nauk Ukrain. RSR Ser. A* (1975), No. 7, 579–581, 667.
- [4] Belinskii, E. S., Summability of multiple Fourier series at Lebesgue points. (Russian) *Teor. Funkcii Funkcional. Anal. i Prilozen.* **23** (1975), 3–12, 169.
- [5] Belinskii, E. S., On asymptotic behavior of integral norms of trigonometric polynomials. (Russian) Metric questions of the theory of functions and mappings, “Naukova Dumka”, Kiev, **6** (1975), 15–24.
- [6] Belinskii, E. S., An application of the Fourier transform to the summability of Fourier series. (Russian) *Sibirsk. Mat. Z.* **18** (1977), 497–511.
- [7] Belinskii, E. S., Behavior of Lebesgue constants in certain methods of summation of multiple Fourier series. (Russian) Metric questions of the theory of functions and mappings, pp. 19–39, 166, “Naukova Dumka”, Kiev, (1977).
- [8] Belinskii, E. S., Some properties of hyperbolic partial sums of Fourier series and integrals. (Russian) *Dokl. Akad. Nauk Ukrain. SSR Ser. A* **10** (1978), 869–870, 955.
- [9] Belinskii, E. S., Some properties of hyperbolic partial sums. (Russian) Theory of functions and mappings (Russian), pp. 28–36, 175, “Naukova Dumka”, Kiev, (1979).
- [10] Belinskii, E. S., Lifljand, I. R., Lebesgue constants and integrability of the Fourier transform of a radial function. (Russian) *Dokl. Akad. Nauk Ukrain. SSR Ser. A* (1980), 5–10, 91.
- [11] Belinskii, E. S., Trigub, R. M., Some numerical inequalities and their application in the theory of summability of Fourier series. (Russian) Constructive theory of functions and the theory of mappings, G. D. Suvorov, V. I. Belyi, and Ya. Gutlanskii eds., pp. 70–81, 149, “Naukova Dumka”, Kiev, (1982).
- [12] Belinskii, E. S., Lifyand, I. R., Asymptotic behavior of the Lebesgue constants of radial summability methods. (Russian) Constructive theory of functions and the theory of mappings, G. D. Suvorov, V. I. Belyi, and Ya. Gutlanskii eds., pp. 49–70, 149, “Naukova Dumka”, Kiev, (1982).
- [13] Belinskii, E. S., Growth of the Lebesgue constants of partial sums generated by certain unbounded sets. (Russian) Theory of mappings and approximation of functions, 18–20, “Naukova Dumka”, Kiev, (1983).
- [14] Belinskii, E. S., Trigub, R. M., Summability of a Lebesgue set, and a Banach algebra.

- (Russian) Theory of functions and approximations, Part 2 (Saratov, 1982), 29–34, Saratov. Gos. Univ., Saratov, (1983).
- [15] Belinskii, E. S., On the summability of Fourier series with the method of lacunary arithmetic means. *Anal. Math.* **10** (1984), 275–282.
- [16] Belinskii, E. S., Approximation of periodic functions by a “floating” system of exponentials, and trigonometric diameters. (Russian) Studies in the theory of functions of several real variables, 10–24, 150, Yaroslav. Gos. Univ., Yaroslavl’, (1984).
- [17] Belinskii, E. S., Approximation of periodic functions of several variables by a “floating” system of exponentials, and trigonometric widths. (Russian) *Dokl. Akad. Nauk SSSR* **284** (1985), 1294–1297.
- [18] Belinskii, E. S., Approximation of classes of smooth functions by trigonometric polynomials with a given number of harmonics. (Russian) Reports of the extended sessions of a seminar of the I. N. Vekua Institute of Applied Mathematics, Vol. I, (Russian) (Tbilisi, 1985), 29–32, 177, Tbilis. Gos. Univ., Tbilisi, (1985).
- [19] Belinskii, E. S., Trigonometric diameters of some classes of smooth functions of several variables. (Russian) Theory of functions and approximations, Part 2 (Russian) (Saratov, 1984), 39–42, Saratov. Gos. Univ., Saratov, (1986).
- [20] Belinskii, E. S., On the summability of Fourier series with the method of lacunary arithmetic means. (Russian) *The theory of approximation of functions. Proc. Int. Conf. Approx. Theory, Kiev 1983*, Nauka, Moscow, 1987, 48–49.
- [21] Belinskii, E. S., Approximation by a “floating” system of exponentials of classes of smooth periodic functions. (Russian) *Mat. Sb. (N.S.)* **132** (1987), 20–27, 142; translation in *Math. USSR-Sb.* **60** (1988), 19–27.
- [22] Belinskii, E. S., Approximation by a “floating” system of exponentials, and estimates for  $\epsilon$ -entropy. (Russian) Theory of functions and approximations, Part 1 (Saratov, 1986), 142–144, Saratov. Gos. Univ., Saratov, (1987).
- [23] Belinskii, E. S., Liflyand, I. R., The behavior of Lebesgue constants of hyperbolic partial sums. (Russian) *Mat. Zametki* **43** (1988), 192–196, 300; translation in *Math. Notes* **43** (1988), 107–109.
- [24] Belinskii, E. S., Approximation by a “floating” system of exponentials on classes of periodic functions with a bounded mixed derivative. (Russian) Studies in the theory of functions of several real variables (Russian), 16–33, Matematika, Yaroslav. Gos. Univ., Yaroslavl, (1988).
- [25] Belinskii, E. S., Approximation of functions of several variables by trigonometric polynomials with given number of harmonics, and estimates of  $\epsilon$ -entropy. *Anal. Math.* **15** (1989), 67–74.
- [26] Belinskii, E. S., Approximation by a “floating” system of exponentials on the classes of periodic smooth functions (Russian), *Trudy MIAN SSSR*, **180** (1987), 46–47; translation in Proc. Steklov Math. Inst., **180** (1989), 51–52.

- [27] Belinskii, E. S., Asymptotic characteristics of classes of functions with conditions on the mixed derivative (mixed difference). (Russian) *Studies in the theory of functions of several real variables*, 22–37, Matematika, Yaroslav. Gos. Univ., Yaroslavl, (1990).
- [28] Belinskii, E. S., Two extremal problems for trigonometric polynomials with a given number of harmonics. (Russian) *Mat. Zametki* **49** (1991), 12–18, 159; translation in *Math. Notes* **49** (1991), 10–14.
- [29] Belinskii, E. S., Estimates for Kolmogorov widths of classes of functions with conditions for the mixed difference in the uniform metric. (Russian) *Mat. Zametki* **50** (1991), 147–149; translation in *Math. Notes* **50** (1991), 1198–1200 (1992).
- [30] Belinskii, E. S., Galeev, E. M., On the least norm value of mixed derivatives of trigonometric polynomials with a given number of harmonics. (Russian) *Vestnik Moskov. Univ. Ser. I Mat. Mekh.* **101** (1991), 3–7, 101; translation in *Moscow Univ. Math. Bull.* **46** (1991), 4–7.
- [31] Belinskii, E. S., On an algebra of functions not generated by its idempotents. (Russian) *Mat. Zametki* **51** (1992), 3–7, 160; translation in *Math. Notes* **51** (1992), 3–6.
- [32] Belinskii, E. S., Strong summability of periodic functions and embedding theorems. (Russian) *Dokl. Akad. Nauk* **332** (1993), 133–134; translation in *Russian Acad. Sci. Dokl. Math.* **48** (1994), 255–258.
- [33] Belinskii, Eduard, Lifyand, Elijah, Approximation properties in  $L_p$ ,  $0 < p < 1$ . *Funct. Approx. Comment. Math.* **22** (1993), 189–199 (1994).
- [34] Belinskii, E., Functional classes with “dominated” mixed derivative and the  $K$ -functional. *J. Approx. Theory* **83** (1995), 137–140.
- [35] Belinskii, E. S., Strong summability of Fourier series of the periodic functions from  $H^p$  ( $0 < p \leq 1$ ). *Constr. Approx.* **12** (1996), 187–195.
- [36] Belinsky, E. S., Summability of Fourier series with the method of lacunary arithmetical means at the Lebesgue points. *Proc. Amer. Math. Soc.* **125** (1997), 3689–3693.
- [37] Belinskii, E. S., Lifyand, E. R., Trigub, R. M., The Banach algebra  $A^*$  and its properties. *J. Fourier Anal. Appl.* **3** (1997), 103–129.
- [38] Belinskii, E. S., Decomposition theorems and approximation by a “floating” system of exponentials. *Trans. Amer. Math. Soc.* **350** (1998), 43–53.
- [39] Belinsky, E. S., Estimates of entropy numbers and Gaussian measures for classes of functions with bounded mixed derivative. *J. Approx. Theory* **93** (1998), 114–127.
- [40] Belinsky, E. S., Strong summability for the Marcinkiewicz means in the integral metric and related questions. *J. Austral. Math. Soc. Ser. A* **65** (1998), 303–312.
- [41] Belinskii, E. S., Interpolation and integral norms of hyperbolic polynomials. (Russian) *Mat. Zametki* **66** (1999), 20–29; translation in *Math. Notes* **66** (1999), 16–23 (2000).
